CAUTIONARY STATEMENT

Forward-Looking Statements:

This presentation contains “forward-looking statements” within the meaning of Section 27A of the Securities Act of 1933, as amended, and Section 21E of the Securities Exchange Act of 1934, as amended. Although the forward-looking statements in this presentation reflect the good faith judgment of management, forward-looking statements are inherently subject to known and unknown risks and uncertainties that may cause actual results to be materially different from those discussed in these forward-looking statements. Readers are urged to carefully review and consider the various disclosures made by us in our reports filed with the Securities and Exchange Commission, including the risk factors that attempt to advise interested parties of the risks that may affect our business, financial condition, results of operation and cash flows.

If one or more of these risks or uncertainties materialize, or if the underlying assumptions prove incorrect, our actual results may vary materially from those expected or projected. Readers are urged not to place undue reliance on these forward-looking statements, which speak only as of the date of this release. We assume no obligation to update any forward-looking statements in order to reflect any event or circumstance that may arise after the date of this presentation.

We Are Very Different

- 28 State-level law enforcement agencies use Intellicheck to validate ID's. Why is that important?
 - **Law enforcement** alone can check ID's with every **DMV** in North America
 - Yet **they choose Intellicheck** instead because we are **just as accurate and lightning fast**

WE BELIEVE NO OTHER ID VALIDATION PROVIDER CAN SAY THIS

We Are Very Different

- For in-branch or retail use cases, we typically work with the existing hardware
 - Point-of-sale scanner, branch check scanner
 - In use at over 4,800 bank or lender branches and over 30,000 retail locations
- For digital use cases, our accuracy means our clients introduce less friction in their customer process
 - No need for front, back and selfie – 1 step, less abandonment

NO LARGE UPFRONT COSTS, SIMPLIFIED USER EXPERIENCE

How We Are Used To Stop Fraud Losses

- Physical and Digital New Account Opening Opportunities
 - Instant credit, BNPL, bank accounts, loans, automotive test drives, title insurance, etc.
 - In-person or through website or mobile app
- Card-Not-Present
 - “I forgot my store-branded credit card; can you look me up?”
- Bank Branches and Call Centers
 - Validate who you are for risky transactions/account updates to stop account takeover

ADJUSTED EBITDA RECONCILIATION

Adjusted EBITDA

We use Adjusted EBITDA as a non-GAAP financial performance measurement. Adjusted EBITDA is calculated by adjusting net income (loss) for certain reductions such as gains on debt forgiveness and interest and other income and certain addbacks such as income taxes, impairments of long-lived assets and goodwill, depreciation, amortization, and equity compensation expense. Adjusted EBITDA is provided to investors to supplement the results of operations reported in accordance with GAAP. Management believes that Adjusted EBITDA provides an additional tool for investors to use in comparing our financial results with other companies that also use Adjusted EBITDA in their communications to investors. By excluding non-cash charges such as gains on debt forgiveness, impairments of long-lived assets and goodwill, amortization, depreciation, and equity compensation, as well as non-operating charges for interest and income taxes, investors can evaluate our operations and can compare the results on a more consistent basis to the results of other companies. In addition, Adjusted EBITDA is one of the primary measures management uses to monitor and evaluate financial and operating results.

We consider Adjusted EBITDA to be an important indicator of our operational strength and performance of our business and a useful measure of our historical operating trends. However, there are significant limitations to the use of Adjusted EBITDA since it excludes gains on debt forgiveness, interest and other income, impairments of long-lived assets and goodwill, equity compensation expense, all of which impact our profitability, as well as depreciation and amortization related to the use of long-term assets which benefit multiple periods. We believe that these limitations are compensated by providing Adjusted EBITDA only with GAAP net income (loss) and clearly identifying the difference between the two measures. Consequently, Adjusted EBITDA should not be considered in isolation or as a substitute for net income (loss) presented in accordance with GAAP. Adjusted EBITDA as defined by us may not be comparable with similarly named measures provided by other entities.
